Kamalakar reddy
Full-stack java developer

I am a committed developer with skills in making user-friendly designs using HTML, CSS, and Angular. I am also experienced in building robust systems using Spring Boot and Hibernate for smooth communication. I like sharing technical concepts with various teams and am excited to bring my creativity to a dynamic group. I'm also proficient in creating and integrating Restful APIs for seamless communication.

Skills

Front-end Skills

- Html
- Css
- Angular

Back-end Skills

- CoreJava
- SpringBoot
- RestAPI
- Hibernate Jpa
- MySql
- Spring security & JWT Token

Education

Bachelor of Technology
Visvesvaraya Technological University
College : KLS Gogte institute of technology,Belagavi
Branch : Computer science
CGPA : 6.4(CGPA)

Pre-University Course
College : Sc gurukul PU college karadyal,Bidar
Percentage : 86%

High School
College : Sc gurukul PU college karadyal,Bidar
Percentage : 83.36%

Project Experience

Project = 01

Tools used : Visual studio code

Technologys :Html | Css | Angular | Json server | RestApi

E-commerce Website

- Developed e-commerce site with user/seller modules.
- Designed HTML, CSS, Angular interfaces.
- Enabled easy product search.
- Created efficient cart system.
- Integrated JSON Server APIs.
- Designed seller module for product management.
- Implemented secure, smooth checkout process.
- Demonstrated web dev, API, UX skills.

Project = 02

Tools used : IntelliJ IDEA | Postman | MySQL Workbench

Technologys :corejava| SpringMVC | RestApi | hibernate | MySql

My Blog App

- Demonstrates skills in Backend development, REST API design, database management, and security integration
- Developed dynamic blog app with Spring Boot, Hibernate JPA.
- Integrated Spring Security with JWT for authentication.
- Implemented one-to-many mapping relationship between post and comment modules.
- Executed efficient CRUD operations through REST APIs.
- Utilized IntelliJ IDEA, MySQL Workbench, and Postman.

Project = 03

Tools used : IntelliJ IDEA | Postman | MySQL Workbench | V.S Code

Technologys :corejava| SpringMVC | RestApi | hibernate | MySql | Html | Css |Angular

Customer management System(full-stack application)

- Spearheaded full-stack project showcasing REST API design, database management, and frontend integration.
- Developed customer management functionalities: addition, deletion, updating, and retrieval.
- Utilized HTML, CSS, and Angular for intuitive user interactions.
- Ensured seamless backend operations for robust database management.
- Highlighted expertise in RESTful architecture and user-centered design.
- Demonstrates proficiency in both frontend and backend technologies.
